

Bruce Mumper
Environmental Representative

BACKGROUND

As multigenerational native Southern Californians, my wife, Lorna, and I witnessed the development of the vast cattle lands and fruit orchards that made up so much of their Orange County childhood. Therefore, in 1980, when we began taking frequent trips to Cambria, where the open spaces felt like a homecoming, our hope was to one day live in the area and help preserve it as a tribute to our past and a treasure for the future

LIVING ON THE NORTH COAST

Since becoming Cambria homeowners in 2005, we have greatly enjoyed our participation in the service of the local community in many capacities. I have volunteered and served in executive positions with various non-profit corporations in California over the last 40 years.

In Cambria, I serve on the Board of the Friends of the Fiscalini Ranch Preserve, Cambria Forest Committee, and Cambria Fire Safe Focus Group.

In addition to my current involvement with the North Coast Advisory Council, I also find great satisfaction in serving my Cambria neighbors as a home health physical therapist.
